

Optogenetics Starterkit

Your easy start into optogenetics

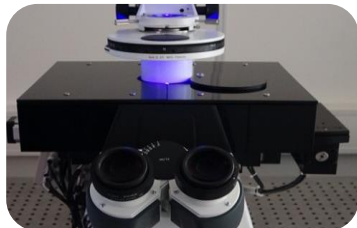

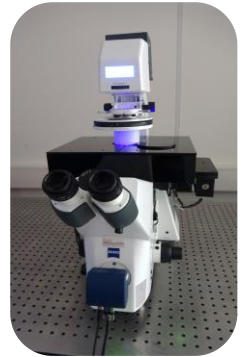

Modular System

Ready-to-use Tools

User-friendly Software

Selective Cell Stimulation

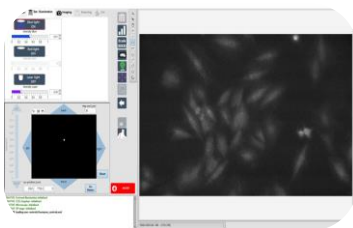

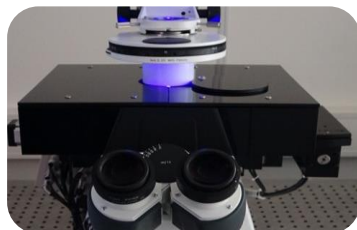

Your easy start in optogenetics with the Optogenetics Starterkit

Modular System
Customize your system and combine existing hardware with new modules.

Ready-to-use Tools

No time-consuming establishment phases for optogenetic experiments due to a perfectly matched complete system.

User-friendly Software
Simple planning of experiments using the "drag & drop" function and saving of pre-planned experiment sequences.

Selective Cell Stimulation

Uncomplicated integration of a laser beam by using a laser slider for selective cell stimulation in common research microscopes.
